Dragon NaturallySpeaking Professional 11 PC Requirements

Nuance Recommendations:

The install process checks that your system meets the minimum requirements; if they are not met, Dragon NaturallySpeaking **will not be installed**.

- CPU: minimum 1 GHz Intel® Pentium® or equivalent AMD processor or 1.66 GHz Intel® Atom® processor. *We recommend 1.8 GHz Intel Dual Core or equivalent AMD processor.*
- Processor Cache: minimum 512 KB. *We recommend 2 MB.*
- RAM: minimum 1 GB for Windows XP and Windows Vista, and 2 GB for Windows 7 and Windows Server 2003/2008. *We recommend 2 GB RAM for Windows XP and Windows Vista, and 4 GB for Windows 7 and Windows Server 2003/2008 64-bit.*

What we recommend:

Our specifications are designed for USING Dragon efficiently. Quality Assured Office Machines, Inc. recommends the following absolute minimum PC hardware requirements for Dragon:

- **For a Windows XP OS**, 2.4 GHz and 2 GB RAM.
- **For a Windows Vista & 7 OS**, 2.4 GHz and 4 GB RAM.

What makes a computer FASTER?

- Processor Speed
- RAM
- Hard drive speed
- Video graphics cards
- Less programs/services running

What makes a computer SLOWER?

- AntiVirus Software
- Malware and Spyware
- Lack of restarting a PC
- Seldom defragmenting
- Software & OS Settings

DigiGals Advantage

Quality Assured Office Machines – **DIGIGALS** – offering a complete “team” approach to your dictation and transcription needs. With over 20 years combined dictation experience, Marsha Taicher and Wendy Roberts bring their vast knowledge and outstanding technical support to all of their customers. DigiGals are not your typical support team. We take the time to understand each client’s individual needs and are hands on throughout the entire process, starting with discovery, continuing through the installation and ongoing exceptional support. Experience the DigiGals difference!
